SONET[®]
DESIGNED FOR DESIRES

From the chairman's desk

Leading ahead through innovations

At Sonet Ceramics, success is what we live for. It is what fuels our organization and it is what keeps us moving ahead and deliver our absolute best. I am extremely proud of my team for bringing our vision to life. But we've only scratched the surface. We have a long way to go.

India is leaping ahead and opportunities in ceramic industries are tremendous. We also have our sight set on the global market and to take advantage of the growing demand, we are constantly innovating by staying updated with the latest in global sanitaryware design.

I have utmost trust in our team. Their never ending drive and hunger to achieve the goals set by the organization has been instrumental for Sonet's continued success. I am sure this shared passion will help us achieve newer heights and deliver products that will surpass consumer expectations.

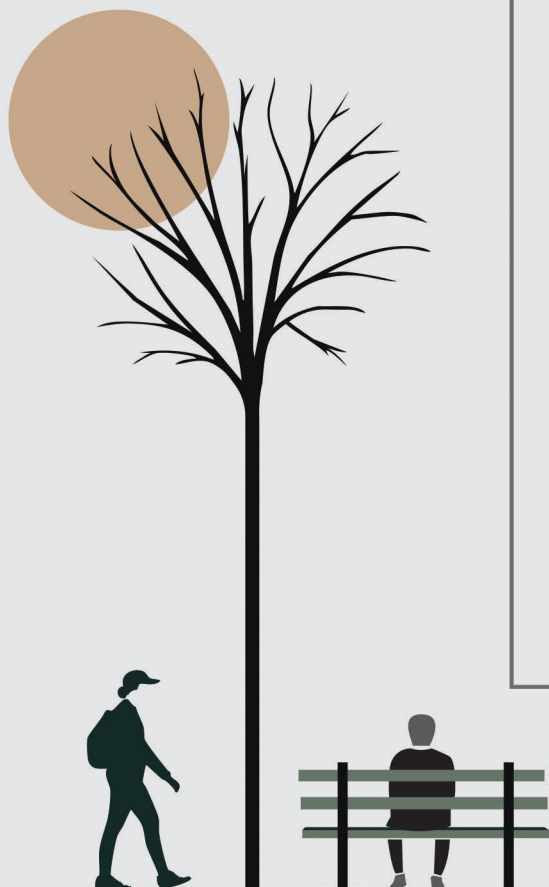

I'd like to personally thank the influencers, architects and interior design specialists, who are not just a constant source of inspiration for us but have also helped us stretch our limits by motivating us to grow and deliver contemporary, elegant and stylish designs.

Last but not the least, we are extremely grateful to our customers, whose valuable inputs constantly keep us innovating.

What is Siphonic Flushing ?

A siphonic flush system also known as a gravity flush system uses vacuum to pull waste from the toilet bowl into the trapway. This is done by the shape of the trapway acting as a siphon. When the flush lever is pulled, the flush valve releases water into the toilet bowl in two ways; firstly through small holes around the seat rim to clean the bowl and secondly through a hole known as the 'siphon jet-hole' which shoots water into the trapway, initiating the siphon effect.

What is Washdown Flushing ?

Washdown flushing is a type of toilet flushing system that uses water weight and gravitational force to eliminate waste from the toilet bowl. In a washdown toilet, water from the tank pours directly into the bowl. The force of the water pushes waste material down the outlet. Washdown toilets typically have a small water surface area in the bowl.
